

2016 Annual Report

Williams County Board of Developmental Disabilities

In 2016, the Williams County Board of DD provided services to over 341 individuals with disabilities residing in Williams County. As you can see from the 2016 Revenue Report, approximately 75% of our funding is provided by local levy funds. In order to make the most of these funds, we continue to leverage Medicaid dollars, resulting in the ability to serve more individuals. In addition, we continuously evaluate our operational expenditures to assure the county that we are fiscally responsible. In 2016, our focus for individuals with disabilities continued to be full community participation, including supporting and facilitating employment in the public, finding ways to volunteer, assisting the individuals in becoming self-advocates, and living the “good life” by maintaining and creating positive relationships with others.
